

MATHÉO PINGET

JUNIOR DEVOPS ENGINEER – CLOUD & AUTOMATION

Apprentice DevOps Engineer certified in AWS & Azure. With a strong technical background in Networking, I design automated (IaC) and secure (DevSecOps) infrastructures. I combine mastery of protocols with Cloud expertise (Terraform, Ansible) to guarantee the resilience and performance of your environments.

EDUCATION

CESI GRADUATE SCHOOL OF
ENGINEERING – LYON

Computer Engineering

2024 – 2027

IUT1 – GRENOBLE

Bachelor's Degree in Networks
and Telecommunications

2021 – 2024

LANGUAGES

French: Native

English: Technical (B2)

CERTIFICATIONS

AWS Certified Cloud Practitioner

Microsoft Azure Fundamentals

AWS Solutions Architect Associate

SKILLS

HARD SKILLS

- **DevOps:** Terraform, Ansible, Docker, GitLab CI, Vault, Kubernetes
- **Cloud & Sys:** Linux, Windows Server, VCD, AWS, Azure, Traefik
- **Network:** Switch, Firewall, Router
- **Dev:** Python, Bash, React, Node.js, REST API

SOFT SKILLS

- Operational rigor
- Initiative / Entrepreneurial spirit
- Teamwork (Agile)

EXPERIENCE

DEVOPS ENGINEER (APPRENTICESHIP) | 2024 – PRESENT

Orange Business | Lyon

- **DevSecOps Project (HashiVault):**
 - Designed a dedicated Ansible role for integrating Vault into existing CI/CD pipelines.
 - Fully automated the deployment and secret management for 100 machines in under 5 minutes.
 - Standardized secret management processes, reducing human error and strengthening security compliance.
- **Infrastructure as Code:** Industrialized server deployment and configuration via Terraform and Ansible.
- **CI/CD :** Designed and maintained GitLab CI pipelines for continuous integration.

FOUNDER & WEB DEVELOPER – JACK.CREATIVE.LAB

Entrepreneurial Project

- Founded a web redesign micro-business for local SMEs. Developed high-performance, SEO-friendly websites (React, Next.js).

NETWORK TECHNICIAN (APPRENTICESHIP) | 2022–2024

Orange | Annemasse

- **Innovation:** Developed a Python tool for fiber optic outage analysis.
- **Network Infrastructure:** Installed and configured routers, switches (Cisco), and firewalls to ensure client connectivity.
- **Support & Collaboration:** Resolved complex technical incidents and communicated directly with clients for ticket tracking.

KEY PROJECT

BREEZY – SOCIAL NETWORK

Microservices Architecture & Scalability – Fullstack & DevOps

- Designed a microservices architecture (Auth, Users, Posts) with Node.js & Express.
- Docker containerization with Traefik (API Gateway / Load Balancer).
- Implemented a CI/CD pipeline for automatic code validation and quality control.
- Implemented secure JWT authentication.
- Optimized performance for constrained environments.
